# PRAEFATIO.

Prodit tandem, quod ad tachygraphiae Romanae cognitionem maxime facit, Lexicon Tironianum, opus arduum et impeditum, diu multumque inter doctrinarum subsidia desideratum (§. 10. 82). Cujus quidem ratio quo melius perspiciatur, nonnulla praemonenda esse videntur, primum de fonte, ex quo potissimum hausi; deinde de difficultatibus, quae in construendo hoc opere superandae erant; denique de commodiore ejus usu.

Ut bonum aptumque sit Lexicon, tria inprimis requiruntur: verborum summa copia, ordo eorum accommodatus, et vera atque exacta interpretatio. *Illam* uberrimam nobis suppeditavit notarum Collectio a Grutero edita (§. 67 seq.); in *his* multa desideranda reliquit Vir doctus. Quandoquidem notae haud ita sunt digestae, ut a quaerentibus facile reperiri possint; neque ita digeri potuerunt omni figurarum *analysi* destitutae. Ab *hac* igitur, tamquam fundamento superstruendi operis, mihi incipiendum esse, continuo intellexi, ex quo ad condendum Lexicon Tironianum me accinxi, multamque curam et operam in eam contuli. Quo factum est, ut,

subtiliorem Tironianae scripturae notitiam assecutus, notarum explicationes nonnumquam invenirem veriores iis, quas Gruterus sua in Collectione vulgavit, magna ex parte miserrime corruptas.

Quam quidem subtiliorem notionem quum non haberet Gruterus, studiis altioribus et ingenio suo dignioribus ab ea sibi comparanda avocatus; quod vera notarum lectio saepius eum fugit, id ei, ut par est, vitio non verto: id vitio verto, quod explicationes earum utique ineptas, et verba notis adscripta, quae nihil omnino significant, cum ceteris edidit, ne ullis quidem annotationibus adspersis, quibus verior sententia perciperetur. Quis enim, quaeso, intelligat, et pro interpretamentis sibi venditari non indignetur, quae exempli causa notavi: *Quindecim viri satisfaciendi*, *Septemviri aepulorum*, *Anticialis*, *Clematur*, *Pantecupium*, *Gaunapum*, *Amitextum*, *Apostfragisma*, *Palachina*, *Hierohaerix*, *Scinobatra*, *Pitauritanus*, *Colobatra*, *Pantadium*, *Pentatheneum*, *Pentarici*, *Platocerus*, *Pethepus*, *Cerdopetephus*, *Scerbilita*, *Sifarus*, *Petrabulum*, *Petrestis*, *Chedagra*, *Iptericus*, *Honoradia*, *Memmatripus*, *Intestigo*, *Ecina*, *Batagra*, *Psicolutra*, *Praesterium*, *Apotesterium*, *Tyrticeum*, *Nyrticeum*, innumeraque alia, quae piget taedetque prosequi omnia.

O Grutere, Grutere, adeone indotatam e manu paterna adoptivam filiam mittere te decebat? adeone sordidam et vitiis squalentem exponere? Quae jam plus quam ducentos explevit misera an-

nos, neque grata acceptaque ulli adhuc fuit, neque umquam fuisset, nisi pro facultatum mearum tenuitate ei dotem, si non dignam, at aliquam, dedissem. Ejus enim, quod profero, Lexici Tironiani possessores habebunt ei insertam etiam illam Collectionem, sed multo meliori forma dotatam: quippe in qua non solum notarum figuras ex literarum, quibus constant, serie disposui; sed in adscriptis etiam interpretationibus errores a negligentia et ignorantia tum librariorum, tum ipsorum Collectionis auctorum, profectos, quoad fieri potuit, correxi, haud quidem expuncta mendosa lectione, sed subjuncta tantummodo veriori interpretatione. Neque enim ego is sum, qui critica audacia novam veteri lectionem substituere, meamque opinionem aliis obtrudere velim, sed liberum, ut decet, suum cuique judicium relinquo.

Difficillimam esse notarum analysin, equidem compertum habeo, neque dubito fore plerosque, qui in mea figurarum interpretatione subinde haereant, eamque vix intelligant, nisi diversas literarum formas probe didicerint, atque in derivatis primitivas, in compositis partes, quibus constant, respexerint. Erunt, ut his utar exemplis, qui mirentur, me in eruendis characteribus notae  qua *Consternit* (p. 73) significatur, literas invenire CN, quum posterior figura speciem potius habeat τȣ S. Sed derivata illa nota comparata cum primitiva  *Sternit* (p. 351), videbunt, hanc nequaquam admittere interpretationem, qua duo S, quae in verbo *Sternit* ne cogitari quidem possunt (§. 122. 172), in nota

inesse statuatur. Mirabuntur fortasse iidem literarum formas, quas habet nota  *Venit in mentem* (399); sed mirari desinent, inspectis compositae hujus notae partibus, quae sunt nota  *Venit* (389), et nota  *In mente* (184). Accidit etiam, ut in notarum figuris conspiciatur litera, cui in verbo, quod nota significatur, nullus est locus; et vicissim, ut vel prima verbi litera a Tironiana nota prorsus absit. Sic literam H, quae in nota  apparet, quam *Almon* (158) interpretamur, in hoc nomine haud legimus. At vero legimus in nomine *Haedus*, cujus nota  non nisi literas ED comprehendit (p. 117). Scilicet ex diversa scribendi ratione id natum esse discrimen, nemo non intelligit. Quae quum praemoneo, id ago, ut ab incauta ad reprehendendum proclivitate censores avertam, omnes admonens lectores, in hoc scriptionis genere nondum satis versatos, a quolibet temerario abstineant judicio.

Sunt vero notae, in quibus dissolvendis diu anceps et incertus haesitavi: sunt etiam aliae, in quarum ratione explicanda adhuc mihi ipsi diffido. Haud igitur sine causa primum hujus operis volumen, licet abhinc annos prope quinque typis jam excusum, sollicitus continui, cavique ne vulgaretur, altero nondum expolito. Etenim una opera, quantumvis gnava et pertinaci, non ita perfici potuisse difficillimum opus, ut ab omnibus erroribus immune esset, facile mihi persuasi, praesertim quum in hac palaeographiae parte peritiorem non habuissem, quem consulerem, ac ne

ullum quidem reperissem, qui saltim legere Tironianas notas posset. Quotquot igitur errores hoc temporis intervallo animadverti, eos neutiquam dissimulatos in altera cumprimis Lexici parte, emendare studui, haud veritus, ne offenderentur eruditi detectis

*— — maculis, quas aut incuria fudit,*
*Aut humana parum cavit natura. —*

Quae autem ad generaliora in demonstranda analyseos difficultate pertinent, ea quidam hoc loco non praetermittenda esse videntur.

Alphabetum Tironianum quum exhiberem (§. 143), negavi literam Y, quippe Latio ignotam, in Tironianis notis deprehendi. Attamen, licet in vocabulis, quae origine sunt Latina, vix reperiatur, reperitur in peregrinis, civitate donatis. Quae quidem quum haud sint frequentia; mirum non est, me, primam notarum analysin suscipientem, non invenisse hanc literam. Jam vero ex notis  *Lyciae, Lycaonia, Tyrii, Tyrus capta, Zelotypus* (p. 216. 387. 409) eam restituens, facilius etiam demonstrabo, quo modo a ceteris, quae ei sunt adnexae, divulsa ejus figura  ex properante tachygraphorum calamo effluxerit. Capitalis enim forma Y, duabus partibus V et I constans, hanc illi, quasi caudam, adnecti patitur. Quam quidem formam quo citius uno calami ductu absolverent tachygraphi, caudam illam a suo loco paulum amoverunt, eodem fere modo, quo ejus locum mutatum esse videmus in Germanorum 𝔜. Proinde quae in capitalibus

literis TV, ut fiat TY, est mutatio, eadem est in notis  et . Neque in levi tantum vel vana conjectura niti hujus literae interpretationem, sed certam eam esse ac manifestam; notarum, quas exhibui, analysis probat, nullo quidem modo processura, hac litera neglecta.

Singulare etiam studium operamque diu frustra posui in solvenda forma, qua exprimitur syllaba *ur:* quae quum in pluribus conspiceretur notis, harum tandem omnium similitudines comparatae viam ostenderunt satis aptam, qua ejus procederet analysis. Sunt autem  *Jactura* (p. 196) *Captura* (202) *Conjectura* (90) *Penuria* (301) *Pauper* (301). Extrema omnium harum notarum pars est R litera, satis frequens in vocabulis, syllaba *er* terminatis; id quod notae docent  *Ter* (p. 384) *Inter* (189) *Praeter* (292) *Propter* (292). U vero praecedens adeo comparet distortum, ut speciem potius habeat literae S, ideoque vix dignoscatur, nisi ab iis, qui, literarum, Merovingicorum regum temporibus, et paulo post, usitatarum, haud ignari, illius formae meminerint, quae ex  caudato, negligentius picto , sensim emanavit. Qua quidem re perpensa, errorem deprehendi, in quem abreptus sum, notam explicans, qua *Pauper* notatur (§. 379), depravata apud Carpentierum (Tab. II) forma insuper impeditus, quo minus veram scriptionis rationem intelligerem.

De alio, quod ex linguarum confusione oritur, impedimento, necessarioque Graecae linguae subsidio in explicandis notis, superius (§. 192) dixi. Jam vero Lexicon aptiora suppeditat exempla in notis Ἄκτιον (p. 11) Ἑξήρης (133) Ἡπτήρης (161) Χαμαίϛρωτον (199) Μονόβιβλα (222) Μαμμόθρεπτος (229) Παλαιϛρίτης (267) Πίθηκος (272) aliisque, quibus vere Graeca significari nomina, nemo in dubium vocabit.

Quae quum de analyseos difficultate non nisi speciminis loco dixi, tantum abest, ut omnia protulerim dubia, ut multa etiam supersint a felicioribus olim explicanda. Atque ne desint exempla, in quibus studiosi possint judicii acumen exercere, ablegatos eos velim ad notas, quae in Gruteriana Collectione (p. 81) cum particula *Nihil* compositae sunt; vel ad eas, quae ex verbo *Prosum* (p. 7) originem traxerunt, ceterasque, quarum characteres, ob brevitatis studium, ita sunt sensim deformati, ut vix discerni queant. Ejusmodi notas in partes, quibus constant, dissolvere, perardua res est, quam nemo fere umquam perficiet, nisi cui contigerit, ut primam obscurorum characterum formam feliciter eruat. Exemplo sint notae 
 *Quicunque* (Lex. p. 309) *Quaecunque* (310) *Quocunque* (310) *Cujuscunque, Cuicunque* (65) *Quemcunque* (309) *Quamcunque* (310) *Quacunque* (305) *Quibuscunque* (310) *Quibuscunque rebus* (309) *Utcunque* (407) *Quotiescunque* (309).

Harum omnium prima pars facile adgnoscitur ex simplicibus notis

*Quis* (302) *Quae* (310) *Quo* (304) *Cujus* (65) *Cui* (64) *Quem* (302) *Quam* (304) *Qua* (304) *Quibus* (309) *Quibus rebus* (308) *Ut* 389) *Quoties* (309); qui vero fiat ut per adjectam tenuem illam lineam his addatur *cunque*, haud quisquam intelliget, nisi cum ea comparaverit notam  *Cum* (52), in eandem tenuem lineam exeuntem; cui, ut notetur *Cumque*, adjici potest punctum, syllabam *Que* significans (409): id quod exemplo illustratur notarum  *Quando*  *Quandocunque* (304). Ita etiam ex nota *Quae*, adjecto *Cum*, primum fit  *Quaecum* (310). Ex hac vero nota deinde factam esse, mihi persuadeo, aliam  *Quaecumque;* denique properante admodum stilo, quam nunc videmus, notam  *Quaecunque.* Ea vero characterum obscuritas aliam laboribus meis attulit difficultatem, ejusmodi notas, suo quamque loco, in Lexico disponendi. Nimirum, quo facilius reperiri possent, ex reliquis, quibus adjectum *Cunque* olim constiterat, literis non nisi clariorem U respicere licuit.

Id enim inprimis mihi curae fuit in apparando Lexico Tironiano, ut faciliorem, quoad fieri posset, ejus usum redderem. Vix tamen aliquis commode libereque eo uti poterit, nisi literarum, quibus notae constant, cognitione instructus accesserit (§. 86 — 145), quippe ex illarum ordine hae sunt digestae, digerique alio modo minime poterant (§. 10. 82). Quapropter nec

audiendi sunt, qui supersedere cupiunt opera hasce literas discendi, haud dissimulantes, commodiorem se Lexici Tironiani usum exspectasse. Quis enim, quaeso, ut hoc utar exemplo, qui ab Hebraeis, ab Arabibus, a Graecis, cet. scripta intelligere laborat, Lexicis uti poterit, nisi literarum, quibus scripta sunt, cognitionem fuerit adeptus?

Quum autem literae Tironianae vel evidentes et perspicuae sint, vel obscurae et ambiguae (§. 258); in eorum gratiam, qui hoc scribendi genere non satis sunt imbuti, neque usu exercitati, eas tantum literas in assignando suo cuique notae loco respexi, quas magis esse perspicuas arbitratus sum, obscuriores dubiasque uncis includi curans. Exemplo sit utraque nota, et qua  *Comtus* (p. 74), et qua  *Colit* (75) significatur, quarum analysis ratione literarum CO nullam quidem habet dubitationem; in linea vero, quae ab O demissa sequitur, multi haesitabunt, neque injuria: in priori enim nota hanc lineam significare M, in posteriori eandem significare L, nonnisi ex ceteris vocabuli literis, quas nota habet, cogitur (§. 258). Eodem, quo dixi, instituto usus, ad explicandas notarum terminationes adhibui quidem literas minores; has autem, quoniam terminationes sunt inconstantes et mutabiles, in ordinanda notarum serie minime respexi. Quare ad majores tantum literas oculos vertant, qui ex literarum ordine notas in hoc Lexico quaerere instituent. Repertis vero notis, minores etiam literas, praesertim eas, quae uncis sunt inclusae, diligenter circumspi-

ciant, ut subtiliorem Tironianae scriptionis cognitionem sibi comparent, quibusque literis notae primitus sint conflatae intelligant, principales earum partes ab accessoriis probe distinguentes. Quum denique in omni scripturarum genere per literarum conjunctionem adeo nonnumquam similes fiant figurae, ut vix discerni queant (§. 169), idque in Tironianis etiam notis accidere soleat; ejus quoque rei rationem habendam esse duxi, saepiusque, ut in viam redire possint aberrantes, de similibus formis eos admonui. Qui igitur figuram —o quaesiverit in EO (p. 124), ex literis, Italico charactere subscriptis, videbit atque intelliget, eandem formam etiam reperiri in IO, LO, et TO. Interdum, quoniam propter duarum literarum similitudinem dubium erat, quo potissimum loco notam reperiri quaerentes arbitrarentur, utroque eam loco inserui. Ceterum si qui forte erunt, qui ambiguas illas notarum literas, in quibus explicandis equidem jamdudum laborans sudavi, melius interpretentur; his ego libenter cedam, et palmam relinquam.

In prima hujus Lexici parte, quia notarum praesertim figuras explicare mihi propositum erat, ordo adhibitus hic est: Exponuntur primo loco ipsae notae Tironianae, ligno incisae. Sequitur earum analysis, majoribus minoribusque literis, ut supra dixi, scripta. Illis distinctos et apertos in notis characteres indicavi; his non solum obscuros et ambiguos (quos quidem uncinis circumdedi), sed etiam terminationes notarum mutabiles. Adjicitur denique explicatio ipsa, Tironianae orthographiae ratione vix habita, quippe

quae ex analysi satis elucet. Interpretationi subinde apposita est, Italico charactere, vel melior lectio, vel usitatior terminatio. Integra vocabula, ut ab iis distinguerentur, quae merae sunt syllabae, majori litera initiali signavi. Numeris, qui singulis versibus subjuncti sunt, paginae significantur Collectionis Gruterianae; quibus si jungitur litera c, indicio est, librum Casselanum (§. 330) diversam a Gruteriana habere vel figuram, vel lectionem. Asteriscus ubi numeris accessit, eo indicatur, sive meliorem formam Gruterianae substitutam, sive, servata principali nota, terminationem solam mutatam esse. Signo §, numeris praeposito, notantur prioris voluminis paragraphi, in quibus uberius quaedam interpretatus sum.

Restare videtur, ut nonnihil etiam moneam de altera Lexici parte, quae quidem eadem vocabula complectitur, quibus in prima parte notae explicantur, sed secundum alphabeti ordinem ita digesta, ut omnium literarum, quibus vocabula perscripta sunt, non paucarum, quibus notae constant, ratio habita sit. Paginae insuper laudantur, in quibus notarum etiam figurae, quas in hac parte omisi, facile reperiri possunt. Hunc vero apparatum neutiquam eo consilio cum eruditis communicavi, ut Tironianis scribere literis discerent, quae inutilis foret opera; sed ut harum literarum facilius redderetur studium. Etenim qui notas Tironianas legere intendit, atque in aliqua incertus haeret, quamvis eam intelligere sibi videatur, jam citius perspicere poterit, verumne viderit, an

erraverit. Quin etiam, opportune oblatam in hac Lexici parte occasionem amplexus, quaedam vocabula uberius explicavi, lectionumque emendatarum causas attuli.

Quae igitur per annos prope nongentos (§. 53. 431 seq.) ignota erat vera Tironianis notis scribendi ratio, hanc ego exponere conatus, quaeque adhuc incomprehensa erat veterum notarum analysis, eam docere aggressus sum: atque ad difficillimae scripturae cognitionem, cujus aditus in tenebris jacens omnibus erat obstructus, viam ulterius progrediendi aperui et munivi, scopulos difficillimos perrumpens, atque impedimenta ubique obvia removens, adhibita in superandis eis incredibili opera, summa diligentia, et, paucis ut complectar, *Germanica* assiduitate atque industria. Quae si non temere de me sunt praedicata, ex his ego, atque ex his solis (§. 8), esse aliquo in numero eruditis videbor.

# LEXICON TIRONIANVM.
